

Choosing Mockups:

Discuss what's working, what still isn't, where they go from here. Also, discuss a strategy for addressing design and technical challenges. How is the page structured? What is the plan for how the design will function responsively? What elements have proven to be problematic or difficult? Post your notes with your feedback and planning decisions.

- Choice of Type is really strong and relates well back to the topic of Fred Beckey
- Think that in general the page is structured well but the images could use a bit more reorganization to make the storyline of events easier to follow
- Adjust point sizes of typography to create a more clear hierarchy
- Images are a bit too large for the desktop view which makes it a bit laborious to scroll through.
